HOBS WITH INTEGRATED EXTRACTOR

The modern extractor solution offers one thing above all – more freedom: A clear view, as the fumes are extracted directly where they arise. Odourless cooking and more freedom in kitchen planning.

High-quality filter systems allow nothing but fresh air to be produced, while still being powerful and noise-free. The perfect combination of heat and air in a single appliance.

EXCELLENT PRODUCT

"The induction hob 5IX 80290 features many innovative functions that allow both flexible cooking and grilling. The innovative extractor fan is particularly impressive", said the jury.

red**dot** winner 2023

The ventilation system is activated automatically when a cooking zone is in use

Simple filter exchange and easy cleaning

2 in 1 – Exhaust and circulating air in one device

Flexible planning – surface- or flush-mounting installation possible

Hobs with integrated extractor

Simple and intuitive operation

Fan motor integrated directly into the hob

State-of-the-art technology and fast installation

Minimalist design

Automatic opening of the extractor fan

Stand-alone hob, combi induction with integrated extractor fan

5IX 94291

EG 1397

Output, consumption – hob

- Voltage: 220 – 240 V
- Total connected load: 7.4 kW
- 4 induction cooking zones with booster:
- 4 cooking zones Ø 19.0 × 21.0 cm, 2.1 kW (3.0 kW)

Design, comfort – hob

- Frameless
- Touch Control
- 2 × combi induction
- Flexible linking – Any two cooking zones can be combined into one cooking zone
- Boost function for all induction cooking zones
- Electronic control in 10 power levels
- Automatic safety switch-off
- Digital display of cooking levels
- Residual heat display for each cooking zone
- Pot detection
- Child lock
- Timer – simultaneously adjustable for each cooking zone
- Countdown function
- Power management
- Flush-mounted installation possible

Dimensions H × W × D

MULTI CONTROL

A unique match

Here everything comes together that belongs together: Blaupunkt hobs with Multi Control  form a unique combination – together with the Multi Control extractor fan hoods. These can be easily controlled using the hob operating panel, and automatically adjust their output in line with the heat generated by the hob.

Here you can find all the
information about Multi Control

EXTRACTOR FAN HOODS

Seared crispy or gently steamed: each meal preparation leaves traces behind in the room. Blaupunkt extractor fan hoods provide fresh air after each cooking experience.

Smart slider

An intuitive, simple control concept for all appliances – every setting can be perfectly selected with the Smart Slider.

Touch Control

Precise, innovative and very user-friendly: gently touching the Touch Control buttons is enough to select the desired setting.

Automatic programmes

One touch away from the perfect result: our automatic programmes are equipped for nearly every ingredient. Cooking can't get any easier.

Soft Moving

Thanks to its advanced dampers and hinges, the oven door can be opened and closed smoothly. Just a light pull/push and the door opens or closes gently.

Steam cooking

Cooking with hot steam is gentle to the food, promises maximum taste and a healthy approach to your cooking.

Pyrolyse

With a simple touch, all residues from baking, frying and grilling at high temperatures are reduced to ashes that can be simply wiped away with a cloth.

Hydrolyse

Easy cleaning at the push of a button: With the aid of heat and steam, even strong soiling can be dissolved.

Induction

Immediately hot, immediately cold, and nothing gets burnt. The base of the pan is directly heated by the induction coil. The heat is only produced where it is needed. This means short heat-up times, more safety and much less energy consumption.

Combi induction

Two induction cooking zones can be combined together to create one single cooking zone, thereby allowing the use of very large pots and pans. Of course, the two large cooking zones can also be used separately.

Multi Control

The extractor fan hood and hob are intelligently linked. The extractor fan hood can be controlled separately using the hob control panel and automatically adjusts the fan power to the heat generated.

LED

The innovative LED lights of Blaupunkt extractor fan hoods ensure even more light on the hob. Another ray of hope: the long-lasting lights consume an extremely low amount of energy.

Air Fry

The hot-air fryer in your oven. Crispy results with little fat.

Water

Hygiene Plus

An especially high short-term temperature level of 70°C for the antibacterial cleaning of dishes with especially high hygienic requirements (e.g. baby bottles) and households with allergy sufferers.

Info Light

The dot on the floor lights up as a visual programme indicator of when the dishwasher is in operation.

Dosing Assistant

Thanks to the dosing assistant, the detergent tab falls directly into a small collection tray. A targeted jet of water dissolves the tab in a quick, controlled way. The detergent is distributed uniformly throughout the machine.

Aquastop

A lifelong warranty against water damage. The Aquastop safety system prevents all kinds of water damage – whether on the supply hose or due to a leak in the machine.

Vario hinges

Vario hinges eliminate gaps between the various elements of a kitchen. The integrated furniture front moves when it is opened. This prevents the gaps between the fronts of these elements from becoming too large.

Cold

NoFrost

The NoFrost system drains the humidity from the freezer and prevents the formation of ice on the inner walls and hoarfrost on the food.

Super Freezing

With the Super Freezing function, the item is cooled down to -30°C so that newly stored food does not interrupt the freezing process.

Big Box

Transparent freezer drawers offer an excellent overview. A highlight: the special Big Box. It is 29 cm high and offers an enormous amount of space, e.g. for a large goose, several pizzas or large freezer portions.

Extra Fresh Professional

Both the temperature and humidity are crucial for keeping things fresh for longer. Food in the Extra Fresh Zone is stored at nearly 0°C and therefore stays fresh up to three times longer.

Electronic control

With electronic temperature control, Blaupunkt refrigerations always have the right temperature. It can be read exactly at any time via the digital LED display.

LED light

The long-lasting LED lights are integrated flat in the side walls and illuminate the interior uniformly and perfectly.
